

Sound-insulated centrifugal fans

ISO

Air capacity – up to 2140 m³/h

■ Use

- Supply and exhaust ventilation systems installed in premises with high requirements to the noise level.
- Compatible with Ø 100 up to 315 mm round air ducts.

■ Design

- Aluzinc casing internally filled with thermal and sound-insulating layer of foamed polystyrene.
- Connecting spigots are equipped with rubber seals.
- The fan is equipped with a power cord for standard size 100-250 or a terminal block for standard size 315.

■ Motor

- Two- or four-pole asynchronous motor with external rotor and centrifugal impeller with forward curved blades.
- Equipped with ball bearings for longer service life.
- Integrated thermal protection with automatic restart.
- Dynamically balanced turbine.

■ Speed control

- Smooth speed control with an external thyristor controller or step speed control with an external auto transformer (both available upon separate order).

■ Mounting

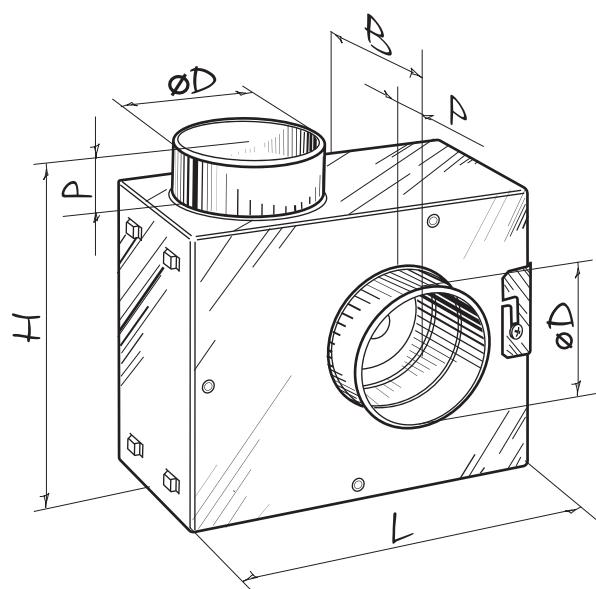

- Mounting in any position.
- Fixed to wall or ceiling with a fixing bracket supplied as a standard.
- Flexible air ducts are fixed on fan spigots with clamps.

■ Modifications and options

- G** – temperature and speed controller with external temperature sensor fixed on 4 m cable. The fan is equipped with a power cord with a socket or a plug (**G1**).
- GI** – temperature and speed controller with a sensor built into the fan casing. The fan is equipped with a power cord with a socket or plug (**GI1**). G and GI options are used for automatic speed control depending on indoor temperature. The best ventilation solution for the premises requiring permanent temperature control as greenhouses, orangeries, etc.
- W** – the fan is equipped with a power cord and a socket or plug (**W1**).

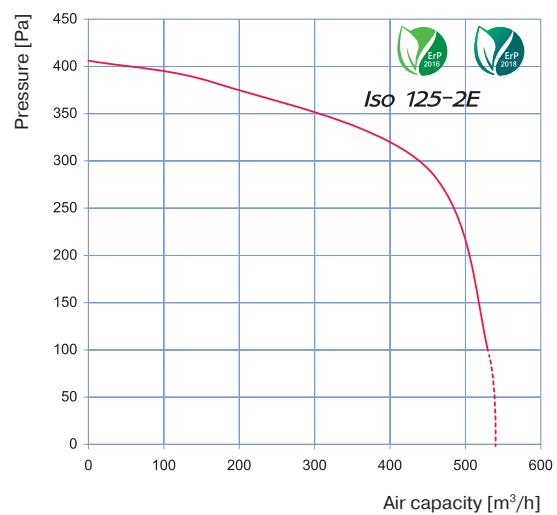

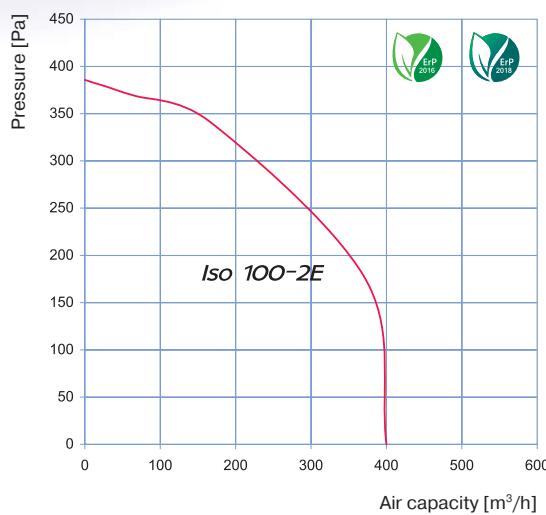

■ Overall dimensions
